

Hunt groups

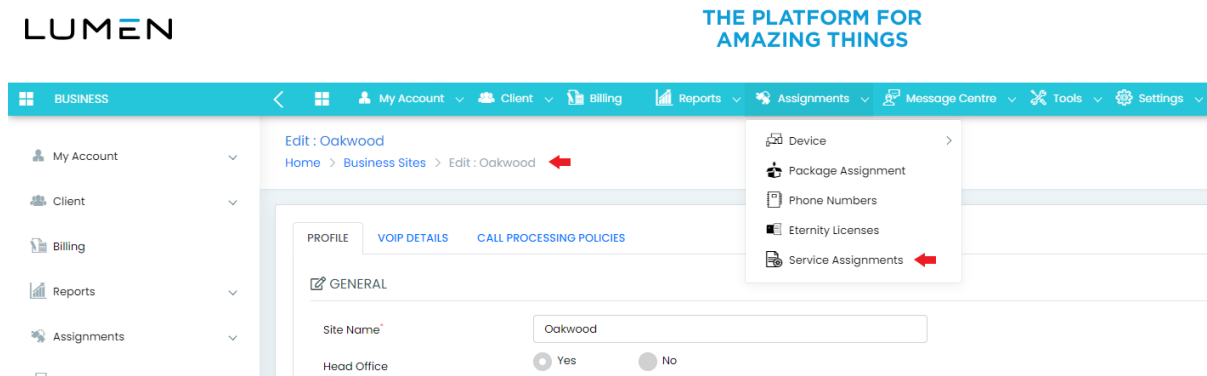

February 2023

Adding a hunt group

A Hunt Group is a 'group service' rather than a package and required to be assigned at Site level, but still allows users from other sites to be assigned to the HG.

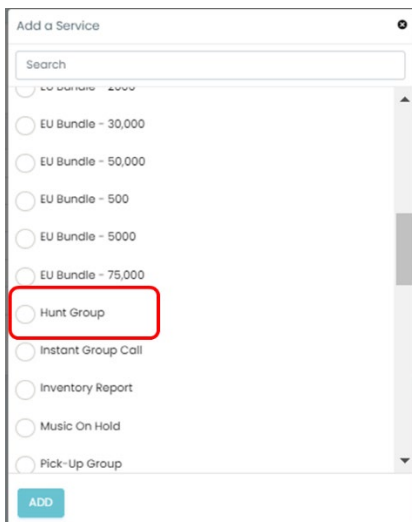

- Select the Site the Hunt Group is going to be created in

Client > Business Site > **'Assignments'**(Top Menu) > **'Service Assignments'**

Select

Select the **"Hunt Group"** from the Service drop box

Select

Complete the following, mandatory fields shown in bold

- **Instance ID** - this is normally the telephone number to avoid conflicts with other users
- **Instance Name** – a recognisable name so that it can be easily searched
- Description – if required

- **Calling Line ID First Name** - will indicate which Hunt Group the call is coming in on
- **Calling ID Last Name** - will indicate which Hunt Group the call is coming in on
- **Input a password and confirm** (this may be used by administrators to access the Hunt Group set up)
- Select the VoIP Telephone number or extension only
- **Extension number for the Hunt Group.**

BW-HUNT GROUP

Instance ID *	<input type="text" value="443306051962"/>	<input type="text" value="@voice.uk.level3.com"/>
Instance Name *	<input type="text" value="Oakwood TechSupport"/>	
Description	<input type="text"/>	
Calling Line ID First Name *	<input type="text" value="Oakwood"/>	
Calling Line ID Last Name *	<input type="text" value="TS"/>	
Password *	<input type="password" value="....."/>	<div style="width: 20px; height: 10px; background-color: green; display: inline-block;"></div> Very Strong
Confirm Password *	<input type="password" value="....."/>	
VoIP Number	<input type="text" value="+443306051962"/>	
Extension *	<input type="text" value="1962"/>	<input type="button" value="GET NEXT EXTENSION"/>

Select the '**Call Policy**' from the drop down box – Regular, Circular, Simultaneous or Uniform and this will dictate how the calls are delivered (a full description of each type is given in blue). Insert Charge Site and Charge Department if required. The '**No Answer Settings**' can be set to forward calls to another internal or external number, a mobile or voicemail (which would need to be set up as a service on the Hunt Group). If zero is left in the box then the calls will continue to ring out on the Hunt Group number. Remember that call charges will be incurred for any calls that are forwarded to an external number or mobile.

The '**Not Reachable Settings**' allow calls to be forwarded to an alternative number (e.g., in the event of a power loss).

Select one of the following options from the Call Policy control to specify how the system routes incoming calls to agents in the group: Circular - Incoming calls hunt through agents in the order they appear on the list, starting with the agent following the agent to receive a call. When the search reaches the end of the list, it loops back to the top and continues until it has tried all users. Regular - Incoming calls hunt through agents in the order they appear on the list, starting from the top each time. Simultaneous - Incoming calls alert all agents at the same time. The first agent to answer handles the call. Uniform - Incoming calls hunt through all agents in order, starting with the agent who has been idle the longest and ending with the agent who most recently answered a call. Weighted Call Distribution - Incoming calls are assigned to idle agents based on percentages you assign.
