Protect your data and IT infrastructure from cyber threats and security incidents and help you manage your risk.

Worldwide, threats from cyber attacks are growing both in numbers and intensity. Cloud Computing, Artificial intelligence(AI), Mobility, and Internet of things(IoT), while delivering all kinds of benefits, exposes you to new types of cyber vulnerabilities, arriving in different ways. At Colt, we prepare global companies for this new era, with an all encompassing secure connectivity, through Colt Managed Firewall services.

can easily become an unwitting security risk and businesses struggle to maintain control of their security, without impacting their business.

Colt Managed firewalls

A managed firewall from Colt mitigates this headache, and plugs a vital security gap, without the need to engage costly in-house IT resource. Colt Firewall service is fully managed by us, including its design, installation, configuration, and day-to-day maintenance of hardware and software components as well as expert support from our proficient cyber security professionals, and 24/7 proactive network monitoring.

Our range of managed firewall services is designed to meet all of your needs: from protecting the Internet Access of a single office, to protecting several sites within your Colt IP VPN network. Our firewall solutions make use of different technologies to meet your needs to balance performance against cost, including network-based virtual firewalls for small sites, or dedicated hardware for more complex and demanding environments.

Firewalls

Firewalls are a critical security layer that virtually all businesses require. But maintaining the perimeter security against the ever changing threat landscape has become a major challenge for many organizations. Firewalls, if not well managed,

Why Colt Managed Security Services
