

Every data centre is just a cross connect away

Benefits at a glance

- **Arrange interconnects between any number of datacentres** – Colt offers services in more than 900 data centre locations in Europe, Asia Pacific and North America – giving you more choice and flexibility than any other carrier
- **It's fast and easy** – Between selected key data centres we are able to provide new connections in as little as five days and upgrades in two days
- **Choose the bandwidth you need** – we offer a wide range of services and bandwidths - from 100Mbps to 100Gbps
- **DCNet On Demand** – our On-Demand services provide instant control over your network at selected key datacentres. Benefit from real-time provisioning and bandwidth flexing via a self-serve portal and a pay-as-you-use billing model
- **Join up your IT seamlessly** with a simple cross connect, even if your IT services are hosted in different cities and countries
- **One simple contract** – with Colt you avoid the need for multiple suppliers and individual network contracts. We are able to offer flexible commercial terms at very competitive pricing profiles

Increasingly, global enterprises are relying on more data centres and in more places around the world. Your global IT strategy is only as good as the quality and reliability of its interconnections. Arranging multi-country connectivity and contracts can be slow, costly, complex and inflexible. But Colt has changed that. We'll take care of it all for you.

DCNet from Colt makes it fast and easy to interconnect the data centres that host your ICT services – even if they are in different cities, countries or continents. Thanks to our pre-provisioned connectivity in key data centres, linking your data centres could take as little as five days or even instantly with Colt's DCNet-on-demand service.

With DCNet, you can energise your global IT strategy with direct access to more than 900 vendor neutral, non-neutral and Colt data centres across Europe, Asia Pacific and North America. Our services provide high-performance, scalable connectivity from a carrier you can trust. As a result, your business-critical IT services work together seamlessly.

DCNet from Colt is great news for companies that rely increasingly on cloud computing, disaster recovery, business continuity planning, content delivery, on-demand applications and a host of other remotely-delivered IT services. Delivering high quality, dependable data centre connectivity is at the heart of our business – making us the partner of choice for DC interconnect.

Colt can help you to expand your network coverage – to keep pace with your evolving IT strategy. Simply add new connections to additional data centres whenever you wish. Our award-winning connectivity services are fast to deploy, cost-effective and easy to manage.

Our Ethernet and Wave (DWDM) services provide simplicity, scalability and flexibility – all from a carrier you can trust. With bandwidth options from 100Mbps packet-based services to 100Gbps optical services, we offer the widest possible choice of technologies and solutions. Colt can guarantee performance and bandwidth, while providing exceptional levels of security and resiliency.

Summary

- Connect to over 900 data centres
- Expedited delivery
- Range of high bandwidth services
- Point-to-point, or point-to-multi point Ethernet or Wave (DWDM) services.
- On-demand features
- Get zero frame/packet loss, consistent low latency and jitter-free connectivity
- Protected services and diverse routes available
- Choose options for maximum resiliency - up to 99.999% availability
- Single point of contact

About Colt

Colt delivers high bandwidth and on demand connectivity to enterprise and wholesale customers in Europe, Asia and North America's largest business hubs. With a fast and focused portfolio of services, Colt enables the digital transformation of businesses through the intelligent, cloud-integrated Colt IQ Network. Colt sets a new standard in experience and capability, connecting over 900 data centres and cloud aggregation points around the globe, with over 27,500 on net buildings and growing. Putting control at the heart of the digital ecosystem, Colt is also recognised as an innovator and pioneer in Software Defined Networks (SDN) and Network Functions Virtualisation (NFV).

Colt knows that connectivity matters and encourages its customers to be more demanding, building its reputation on an industry leading customer experience. With a focus on delivering true local presence and agility, customers include data intensive organisations spanning over 200 connected cities in nearly 30 countries. Colt counts 19 of the top 25 global telecoms companies and 18 out of the top 25 global media companies (Forbes 2000 list, 2016) among its customers. In addition, Colt works with over 50 exchange venues and 13 European central banks. Privately owned, Colt is one of the most financially sound companies in its industry.
