

Environmental Policy Statement

colt

Colt's vision is to be the most customer orientated business in our industry.

As an ISO 14001:2015 certified organisation, Colt aims to offset its environmental impact by enhancing its environmental performance and by eliminating or reducing environmental pollution, where technically, organisationally, and economically feasible.

The purpose of this Policy is to ensure that all relevant activities, products and services of the organization are identified and carried out in compliance with the relevant in-country environmental legislation and other requirements including but not limited to prevention of pollution, by:

- Ensuring the company promotes and encourages best practice and innovation through our employees, contractors and products/services.
- Conserving natural resources by adopting pollution prevention practices. E.g.: extending the life of equipment through preventive maintenance scheduling, purchasing and reworking used equipment etc.
- Ensuring the responsible use of energy throughout our business including; conserving energy, improving energy efficiency and giving preference to renewable over non-renewable energy when feasible.
- Meeting and exceeding all applicable European, national and local requirements set and adhere to stringent requirements no matter where we conduct business.
- Ensuring the procedures we have in place are periodically reviewed for environmental compliance with all applicable laws and regulations.
- Promptly reporting all noncompliance issues in accordance with reporting requirements, evaluating causes of noncompliance, identifying and implementing corrective actions.
- Maintaining compliance and accreditation to the requirements of ISO 14001:2015.
- Environmental Responsibility and Environmental Enhancement - we actively monitor the implementation of our Environmental Policy, both internally and with our clients.
- Developing and improving operations and processes to reduce waste, and other pollution, minimize environmental risks and dispose of waste safely and responsibly. We prepare contingency plans to deal with environmental incidents.
- Striving to continuously improve our commitment to the above-stated principles through exercise of our EMS, improved technology, production changes and due diligence.
- Promoting environmental awareness among our employees and encourage them to work in an environmentally responsible manner.

We create and maintain an environmental management system (EMS) to ensure that our Management Teams across all geographies are kept informed and through the Group environmental objectives and targets supported by local country and site environmental objectives and targets are fully committed to and accountable for improving Colt's environmental performance.
