

Accelerate Your Growth with Colt Capital Markets in the US

Datasheets

What do these enhancements mean for you?

✔ Extended US market reach

Our extended market reach has led to greater access to key US Exchanges, market data and enhanced services, providing our customers increased connectivity that supports growth and simplifies access to complex markets and datasets.

✔ Highest level of resiliency

Our solution delivers comprehensive resiliency for production environments whilst integrating robust disaster recovery measures if unforeseen disruptions occur.

✔ Seamless connectivity and service monitoring

Combined with Colt's proprietary Market Data Monitoring System (MMS), our solution delivers low-latency, real-time insights into service performance, ensuring seamless market data feed analysis and usage across the PrizmNet network.

Empowering Customers to Unlock New Financial Markets with Ease

Connecting you to new opportunities

Ongoing global demand for access to the US securities market – the largest liquidity market – is driving growth and high demand for access to this financial region.

The U.S. equity markets represent [42.6% of the \\$115.0 trillion in global equity market cap](#), or \$49.0 trillion; this is 3.9x the next largest market, the EU. With U.S. fixed-income markets comprising 39.3% of the \$140.7 trillion securities outstanding across the globe, this is also 2.1x larger than the EU market. Entities globally, whether EU, Asian or trans-American, need secure, resilient and always-on access to this fruitful trading ecosystem.

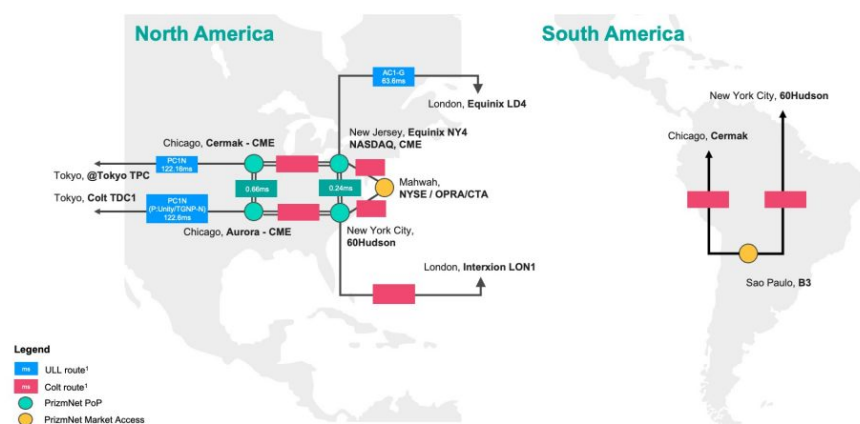

Why Colt

Colt has been serving the financial services sector for over 30 years. Today, Colt's Capital Markets solutions cover over 180 exchanges and liquidity venues globally. With a well-established presence in Europe, Asia and North America, Colt enables a trusted community of 10,000+ financial sector firms worldwide.

Our solutions are designed to reduce risk and complexity and accelerate your time to market with rapid implementation, end-to-end SLAs, flexible contracts and service-based pricing.

Colt has made significant investments to expand its US market data infrastructure to ensure secure, non-disruptive low latency market data feeds to its global network by adding new Points of Presence (PoPs) in New York and upgrading existing backbones and infrastructure. This guarantees that customers benefit from the bandwidth and speed necessary to handle high data volumes from US Exchanges. This expansion, within the US markets, builds on a decade-long presence in the US that connects clients to major North American exchanges.

PrizmNet – South and North America

Colt's expanded market connectivity

As part of our continued North American expansion, we are enhancing our PrizmNet network to provide seamless connectivity to a diverse portfolio of key markets. The foundations for Colt Capital Markets solutions

Whether you need a physical presence or would like to trade remotely, Colt will build a solution that's right for you — technically and commercially — and back it up with SLAs that you can count on with 24/7 support. Your solution will be based on our capital market portfolio offerings combined with any third-party capabilities needed to build out a project specific to your needs.

Exchange colocation

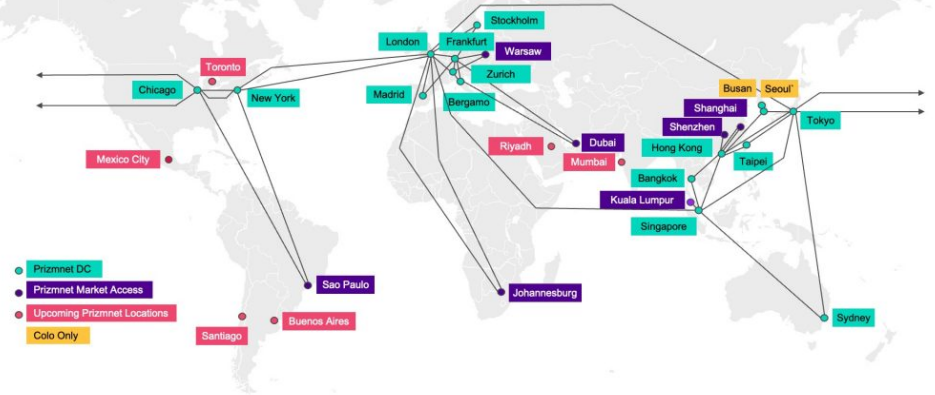

With access to key market venues, Colt exchange colocation and proximity hosting services will save time and money while improving trading speed and resilience. Managed services, remote hands, cross connects, capacity planning and reporting are also available.

Ultra-low latency network services

Designed for the most demanding high-frequency trading needs of buy- and sell-side firms, our ultra-low latency network services are built on high-speed fiber links, using the smallest possible number of media converters, hops and network devices. Our metro, regional and international routes connect you to the major trading venues, enabling you to deliver your multi-asset strategies, deal with shorter opportunity cycles or tighter spreads and pull ahead of the competition.

Capital Markets Global Footprint

Connect to a Global Capital Markets Ecosystem of over 180 exchanges, Venues and Service Providers

Colt's financial market solutions are underpinned by the Colt IQ Network – a 100Gbps optimised intelligent network – distributed to more than 32,000+ on-net buildings, 1,100+ data centres and hundreds of data network connection points around the globe.

With the flexibility and agility to meet the market's requirements, Colt continues to enhance its connectivity offering to ensure its market leadership across the world. To find out more about Colt's Capital Market solutions visit
