

Colt Cloud Manager

Datasheets

Maximise control and agility in the cloud

✓ 24/7 service desk

Users have access to a 24/7 service desk, to provide platform support, ensuring round-the-clock support for any issues or inquiries.

✓ Onboarding support

New customers receive three months of onboarding support, ensuring a smooth transition and seamless cloud environment setup. For this purpose a Technical Account Manager (TAM) is provided and can be extended if required beyond the initial 3 months, for an additional charge.

✓ Vendor agnostic approach

We are cloud agnostic, giving customers the flexibility to choose from a variety of cloud providers such as AWS and Azure without the risk of vendor lock-in.

✓ Professional services packages

We offer comprehensive support, including professional services tailored to your organisation's unique needs, ensuring you maximise the value of your cloud investments.

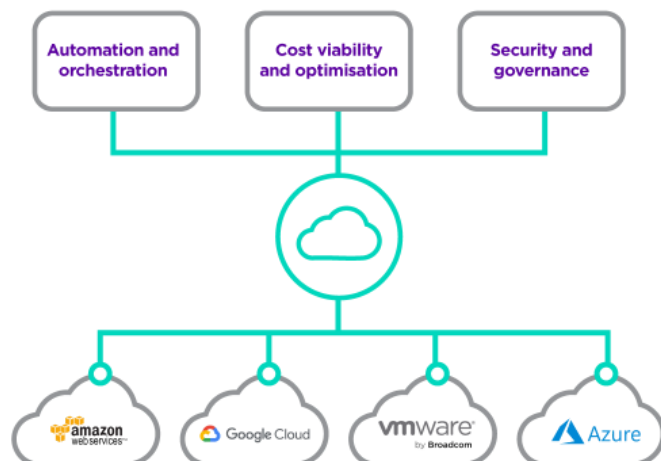

Your trusted partner for cloud management

In today's fast-paced digital landscape, organisations are increasingly turning to cloud computing to support their daily operations. As they scale and embrace hybrid or multi-cloud environments, implementing a centralised management solution becomes essential to efficiently oversee cloud operations, and ensure reliable, agile, and optimised performance within a complex and continuously evolving ecosystem.

Colt's Cloud Manager (CCM) empowers your business with a secure, automated and high-performing cloud management solution, which provides effortless management of your cloud infrastructure, ensuring it remains scalable, cost-effective and aligned with your business goals.

Colt's offering

Colt Cloud Manager (CCM) is an orchestration platform that enables the configuration, deployment, and management of cloud infrastructure and workloads within hybrid cloud, public cloud and private cloud environments.

Key features

Marketplace integration

- Access marketplace to purchase and manage third-party cloud services.

Unified cloud management interface

- Provides a centralised interface for monitoring and managing all cloud services.

Consolidated billing

- Users can consolidate billing for all cloud services, including third-party providers, into a single invoice.

Performance reporting and insights

- Users can generate detailed financial reports to monitor cloud spending and create customisable dashboards for a clear view of financial performance across multiple cloud environments.

Cost management and optimisation

- Users can implement automated processes such as rightsizing, scheduling, and identify unused resources to reduce costs.

Live dashboards

- Users can access real-time data on cloud usage, costs, and performance through customisable dashboards. Features include; personalised widgets, dynamic views, advanced filtering/grouping, and more.

Cloud visibility simplified

Today, organisations are more likely to have part or all of their infrastructure in the cloud. With a wide range of options available – including public, private, hybrid and multi-cloud, it is essential to have a cloud management strategy that provides clear visibility into your cloud environments and enables informed decision-making in support of how and when to run workloads.

CCM empowers you with the latest tools to streamline cloud management, along with the following benefits:

Persona-based insights

Users can tailor cost insights to various roles within the organisation, ensuring relevant information for finance, operations, and development teams. This customisation allows each team to focus on the data most pertinent to their responsibilities.

Proactive management

Predictive analytics are used to anticipate and mitigate potential issues before they impact operations. This feature helps maintain high availability and performance of cloud resources.

Budget alerts

Alerts can be set for budget thresholds, ensuring that any unexpected increases in cloud spend are promptly addressed.

Enhanced cost observability

Utilise advanced AI/ML algorithms to gain detailed insights into cloud spending patterns. This feature helps identify cost-saving opportunities and optimise resource allocation.

Anomaly detection

Receive alerts in support of unusual spending patterns, helping you to prevent cost overruns

Supporting you at every stage of your cloud journey

With over 20 years of experience, we have successfully helped customers migrate, optimise, and monitor their cloud environments. Our expertise ensures seamless transitions, and proactive monitoring, enabling businesses to fully leverage the cloud.

At Colt, we work in partnership with customers to continuously improve their IT across all platforms, including public, private and hybrid cloud, with a proven approach that prioritises cost savings, performance, security, and environmental impact, in ways that are aligned to your business priorities.
